

**PAUMAC TUBING LLC  
STATEMENT OF PURPOSE  
March 20, 2020**

Paumac Tubing, LLC. is a privately-owned company business founded in 2004 operating from two production facilities located at the addresses listed below. Since our inception, our core focus has concentrated on the supply of critical Exhaust, Air In-take and Fluid Conveying tube assemblies. Our products are essential to support the up-time of existing vehicles and the continuous supply of new on-highway heavy trucks and agriculture equipment.

Under the *War Powers Act*, our industry is classified as part of the “**critical manufacturing sector.**” In our case, we supply materials to the transportation and agriculture manufacturers. All critical to our country’s sustainability and recovery.

This classification deems our business as exempt from Federal, State or Local Government mandates to comply with imposed curfews or shelter-in-place orders. The on-highway transportation and agriculture industries support the delivery of medications, medical equipment, food, fuel and other critically essential goods to promote the wellbeing of our country during this time of pandemic crisis.

A complete list of exempt “critical manufacturers” and be found at (<https://www.cisa.gov/critical-infrastructure-sectors>).

My employment credentials can be verified through our Human Resource Department at our corporate office located at 315 Cuttle Road, Marysville, MI 48040 Ph. (810) 985-9400.
